

Business Improvement Leadership Series

Statistical Analysis Handbook SigmaXL Version 8

by George Lee Sye

MAIN TOPICS

[Common SigmaXL Functions and Data Manipulation](#) - [P-value Summary](#) -
[Descriptive Statistics](#) - [Frequency Distributions](#) - [Measurement System
Analysis](#) - [Process Capability](#) - [Normality and Transformations](#) - [Run
Charts & Control Charts](#) - [Stratification](#) - [Hypothesis Testing](#) - [Design of
Experiments](#) - [Correlation and Regression](#) - [Application Examples](#) -
[Bibliography](#)

CONTENTS

Foreword	5
1. The Foundations.....	10
1.1 SigmaXL Shortcuts.....	10
1.2 Common Functions and Data Manipulation.....	10
1.3 Understanding and Using P-Values.....	22
2. Descriptive Statistics	24
2.1 Descriptive Statistics with SigmaXL.....	24
3. Displaying Frequency Distributions.....	28
3.1 Frequency Distributions for Categorical Data.....	28
3.2 Frequency Distributions for Numerical Data	30
4. Measurement System Analysis.....	35
4.1 What is Measurement System Analysis	35
4.2 Gage R&R Overview	35
4.3 Design Gage R&R (for Variables Data).....	37
4.4 Analyse Gage R&R (Crossed).....	38
4.5 Gage R&R (for Binary Attribute Data).....	44
5. Process Capability	48
5.1 Process Capability Overview	48
5.2 Process Capability Analysis (Individuals).....	49
5.3 Process Capability Indices.....	50
5.4 Process Capability Analysis (Stratified).....	51
6. Normality of Data.....	54
6.1 What is Normality Testing.....	54
6.2 Subjective Normality Testing.....	54
6.3 Statistical Based Normality Testing	58
7. Data Transformation.....	60

7.1	Data Transformation Overview	60
7.2	Box Cox Transformation	60
7.3	Capability Analysis (with Transformation)	63
8.	Process Stability	71
8.1	Run Charts and Control Charts Overview	71
8.2	Run Charts with SigmaXL	71
8.3	Control Charts with SigmaXL	75
9.	Stratifying Data To Determine Source of Variation	95
9.1	What is Stratification	95
9.2	Stratification of Data	97
9.3	Stratification of Data with ANOM Charts	105
9.4	Stratification of Data with Pivot Charts	111
9.5	Stratifying by Counts using Chi Square and 100 Percent Stacked Column Charts	118
10.	Hypothesis Testing	119
10.1	The Hypothesis Testing Process	119
10.2	Choosing a Hypothesis Test	120
10.3	Summary of Hypothesis Testing Tools	121
10.4	Hypothesis Testing	122
10.5	Two Way ANOVA	157
11.	Design of Experiments (DOE)	163
11.1	What is DOE	163
11.2	Design Types	163
11.3	Experimental Design Process	163
11.4	Design The Experiment In SigmaXL	166
11.5	Analysing the Experiment	169
11.6	Reducing the Model	170
11.7	Check Validity of the Model using Residual Plots	173

11.8	Factorial Plots for Designed Experiments.....	174
11.9	Response Optimisation.....	177
11.10	Basic Design of Experiments (DOE) Templates	185
11.11	Summary of Terms - DOE Multiple Regression	186
12.	Correlation and Linear Regression.....	189
12.1	Correlation Versus Regression	189
12.2	The Process.....	189
12.3	Correlation Analysis.....	189
12.4	Regression Modelling with SigmaXL.....	195
12.5	Check Validity of Regression Model using Residuals	199
12.6	Summary of Terms for Linear Regression	202
13.	Application Examples	205
13.1	Hypothesis Testing - General Application.....	205
13.2	Hypothesis Testing - Six Sigma Project Examples	207
14.	Terms and Definitions	209
15.	Bibliography.....	209
	The Author.....	210
